

Exploring Prescribing Patterns in Lipid Lowering Therapies and Associated Health Outcomes in an Elderly Population - My Internship Journey

Learn

Skills and methods in quantitative research & using stats in health research

START

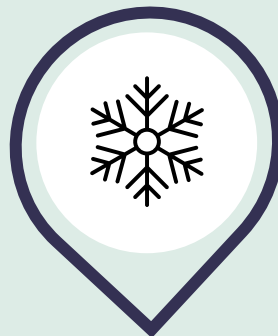

More Learning

Familiarise with SPSS advanced stats analysis software

Method

Using the ELSA – English Longitudinal Study of Aging Dataset

Data Crunching

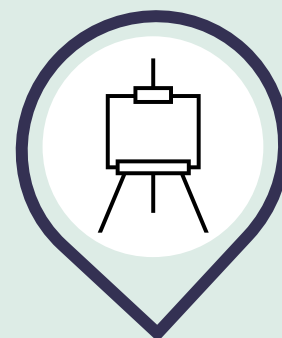

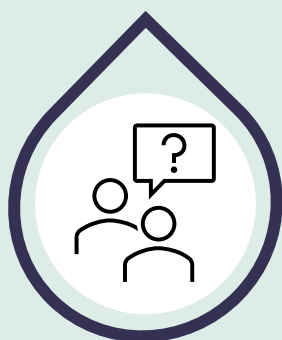

Finding out the data that was available across the years and comparing many variables and co-variables

Research Question Formed

See above - title of the poster 

Combining lipid management and frailty / care of elderly themes

Outcomes and Abstracts

Generate the outcomes from the dataset and progress to an abstract for a future research paper

FUTURE
